

*Index*

# **INDEX**

## **Numerical Terms**

25-second look-up time 25

    how to achieve 49

3-minute initial learning time for an Environment 26

## **Alphabetical Terms**

### **A**

abstract data structure

    explanation of 42

abstract data-type index

    definition of 47

adt index

    definition of 47

    nouns vs. verbs 48

after-the-fact Environments 49

AI Spring, definition of 30

algorithm 20

alphabetical order 21

alphabetical titles 52

atomic task

    definition of 45

### **B**

Basic Task

    definition of 43

book paradigm

    example of erroneous adherence to 41

breaking complex things up into simpler things 15

BTS, definition of 30

building, height of, student's solution to determining 11

bullet

    inserting a in a FrameMaker document 3

### **C**

CAD

    definition of 83

CASE, definition of 29

## *Index*

### CIU

- how to establish 32
- cleverness as requirement of good programming 77
- complex task
  - definition of 43
- complexity of use 88
- consultant
  - advice on becoming a 149
- Copernican revolution in design of software, Environment idea as a 63
- countably infinite
  - definition of 44
- cpu, definition of 18

### **D**

- Design the use! 8
- Dijkstra, Edsger W. 16, 63
- documents as programs 62
- DTD, definition of 63

### **E**

- editing 52, 53
- engineer the use 27
- Environment
  - after-the-fact 49
  - as Copernican revolution in design of software 63
  - as measure of complexity of use 61
  - as nondeterministic "program" 17
  - captures use of software system 88
  - definition of 61
  - importance of testing an 72
  - put the intelligence in the
- Environment designer
  - as user of software 37
- error messages 54

**F**

features 75

**G**

geometrical nature of technical subjects 86

GUI

definition of 38

**H**

heuristic 20

high school student and What vs. How 11

human factors 5, 7, 8

**I**

I/O operations, examples of 97

index

adt

definition of 47

nouns vs. verbs 48

iterative design

definition of 36

history of 38

of GUIs 38

Iterative Prototyping

definition of 38

**J**

just-in-time learning 43

**L**

learning is a red herring 77

liberal arts intuitions 95

LIFO, definition of 97

LISP 38

logic  
    mathematical 101

## **M**

Maximum Disambiguation  
    Rule of 51  
method, new, of Environment design  
    advantages of 65  
Middle Ages  
    late, writing style in iii  
"Mother's Day Meditations from the Computer Room" 94  
multi-media 44  
multimedia 3, 4, 6, 44, 69, 79, 101  
MUSR, definition of 34

## **N**

names for Things 53  
numerical titles 52

## **O**

on-line documentation  
    nothing magic about 73  
outlining term papers 16

## **P**

paradigm shift  
    alphabetical Environments as a 68  
pre-searched documentation 49  
primary task, definition of 34  
procedure call protocol in Environments 39  
profession  
    new, birth of 7  
profession, new  
    possible name for 7  
programs

- as documents 62
- proving correctness of 88
- prose is on the way out 87
- psychology
  - required for Environment design 103
- “Put the intelligence in the Environment!” 50

## **R**

- rationalization of use of software system, Environment as the 61
- readme files 71
- records
  - of use of software system, keeping of 89
- red herring of learning 77
- release notes 71
- Renaissance
  - "new technology" was the rediscovered ancient classics iii
- return from a procedure in an Environment 39
- Rule of Maximum Disambiguation 51

## **S**

- SCCS, definition of 29
- scholarship in study of use of software 88
- secondary task, definition of 35
- semantics vs. syntax 11, 14
- sequence
  - importance of specifying in procedures 40
- speed of access
  - how to improve 49
- structure
  - in computer programming 15
- structured programming 16
- Structured Rapid Prototyping
  - definition of 38
- structure the use 27
- style guides 56
- subtask

definition of 26

## **T**

### Task

Basic, definition of 43

### task

#### atomic

definition of 45

complex, definition of 43

primary, definition of 34

relationship to Thing 41

secondary, definition of 35

### task-oriented manual

definition of 6

evolution of the 6

### technical subjects

geometrical nature of 86

### technical writing

argument against changing name of 93

as similar to real estate profession 93

### template 44

as a means for communicating with software 30

### templates

programming as source of, 93, 96

### testing of Environments 72

### Thing

definition of 41

good practice regarding names of a 53

properties of a 45

relationship to task 41

### throughput 65

definition of 18

greater, as result of efficient Environments 65

increased, as feature of efficient Environments 65

### Turing machine 20

### tutorials

argument against

## **U**

usability vs. pleasantness-of-use iii, 4

use

capture of by Environment 88

complexity of 88

design the 8

examples of difficulty of 3

recording all actions involved in 89

software-oriented vs. Environment-oriented view of 62

structure 7

user

as "central processing unit" 17

user and computer

new view of 17

traditional view of 17

## **W**

waterfall process of design 36

Western civilization, fundamental concepts of 11

What vs. How 11

in commuting to work 13

in computer programming 14

in high school exam question 11

in obtaining Master's degree 13

in solving a quadratic equation 13

writing style

evolution of iii

evolution of since Renaissance iii

## **Y**

"You do it your way and I'll do it mine..." iv
